## Profile

I am a passionate web developer. I have experience with Frontend and Backend of a website. I am team player and understand the dynamics and working of a functional team.

## Final Year Project

### ESTATE | REAL ESTATE WEBSITE

- E-State is an e-commerce web application in which users can buy and sell real estate. Users can upload their real estates by simply providing related information and images of the product.
- Utilizing the 360-degree images provided if any, a virtual tour is generated.
- Developed in MERN stack.

## Projects

### VERTIMENT | E-COMMERCE WEBSITE

- Developed an e-commerce website based on the idea of vertical integration.
- Users can buy and also sell their own products.
- PHP for server-side scripting and MySQL for database development.

### CLOTHING E-COMMERCE WEBSITE

- Developed a web-based platform for buying and selling of cloths and related accessories.
- Users can buy and sell clothes, shoes etc. Developed in MERN stack.

### SCHOOL MANAGEMENT WEBSITE

- A management system for schools which keeps track of students, teachers, classes and fee system.
- The fee system is also developed in which each month fee is added with pending status until the student pays it.
- Result card generation is implemented.
